

PRIORITIES

Just because CN has a problem with congested railway lines, they should NOT make it our problem too.

2004: October 22 - Canadian National Railway (CN) announces that it will open shipping offices in Shanghai and Beijing; the office will advertise CN's shipping abilities to North American destinations, especially on the Pacific coast.
(source: wikipedia; http://en.wikipedia.org/wiki/2004_in_rail_transport)

CN is based on making money, NOT on providing a better future for our children and grand children.

CN ships imports from the far east across our country... do we really need more "MADE IN CHINA" knickknacks? or toys that may be recalled due to safety hazards? or ingredients in pet food that is tainted and deadly? Do we?

_____ No. _____

What we do need is safe communities for our children to live and play in.

Can CN give us the promise of safety? No.

http://www.southtownstar.com/news/1122936,082408ej_emeeting.article
(paragraphs 6 through 8)

I do not want sky-high walls in my back yard to ensure that my grand daughter will be safe from a monster train. I do not like walls or fences of any kind as they separate and isolate instead of uniting us.

What we do need is clean air, water and soil for our children's and grandchildren's survival.

Will CN lesson our pollution or contribute to the already murky city skies?

Will CN contribute more useless, imported, cheap goods that will quickly add to our already mountainous landfills? Is no one looking at the BIG picture? Is everyone merely thinking of 'profit'?

Some day, perhaps, money will be useless,
but now and always, clean air, water and soil is of utmost importance,
it is essential for survival.

I am not fighting the future
rather I am fighting FOR the future...
