My statement is that we have only one fire department that's on the south side of the tracks and we live in an area that there are a lot of people up in years that need the ambulance every once in a while and if that ambulance is out on call to somewhere else and we have to get an ambulance from the north side of the track, they can't get through and that's one of the very, very bad things. Also, the danger of whatever that railroad might be hauling. So often you hear of cases where a tanker blows up or dispells various chemicals that are dangerous. Thank you kindly.
