Transcript:

I just want to leave a statement. I am not in favor of the Canadians buying the railroad. It's going to cause nothing but aggravation for all the people on the route. We will never be able to cross the railroad tracks and our towns can not afford the overpasses. The pollution will be great, there's enough people with asthma now it'll only get worse and if I have an emergency, I'm an older person, and if I'm an ambulance, how do I get across the railroad to go to the hospital? Thank you. Bye
