My name is Kathleen Glass. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 23, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 24 May 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kathy Marrack. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Charlotte Anderson-Robinson. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24th, 2018.

Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Keith Smith. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Laurie Knape. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Mark Mathis. I live in Smith County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Sheryl Manza. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Laurie Guinn. I live in Texas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Vicki Walton. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

/s/Vicki Walton

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24 2018.

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Michael McRae. I live in Texas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Bradley Brock. I live in USA County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on MAY 24, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Thomas Deslatte. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Lauren Ashley. I live in United States County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Stan Emmerich. I live in montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 05/24/2018.

It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Heather Adams. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Stephen Cline. I live in Brazoria County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 05/24/2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Stephen Sims. I live in Dallas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Caroline Ward. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Linda Duncan. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 05-24-2018.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on MAY 24,2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on mAT 24 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Debra Ferris. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Karen Darcy. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is John Robinson. I live in Walker County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Nadia Nolte. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24 2018.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kelley Cruzan. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on may 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Alicia Logan. I live in Limestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Jerrod Harrison. I live in Williamson County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Mary Russell. I live in Collin County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Candice Barousse. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kacey Meurer. I live in TX County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is James Sackett. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is PAIGE SMITH. I live in GRIMES County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is LYNN SMITH. I live in GRIMES County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on MAY 24, 2018.

Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Ty Sword. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Lori Bruno. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 20-8.

/s/Lori Bruno

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 5/24/2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Charles Clark. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Keith Martin. I live in Jack County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Arnold Gray. I live in Limestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Matthew Sword. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

/s/Matthew Sword

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Gary Worthy. I live in Bexar County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

I live in Bexar County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Robert Read. I live in TX County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Brody King. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kinberly Holt. I live in Limestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Guy Glosson. I live in Kent County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 05/25/2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Linda Turley. I live in Collin County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Norman A Bergan, Jr.. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on may25,2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25,2018.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 5/25/18.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Cheryl Berger. I live in Anderson County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on may 25 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Thomas OMeara. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25,2018.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is L M. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Jensen Chen. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project.
