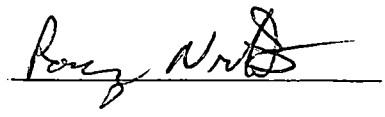
TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Ronney Nichols. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Gia Bogues. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is PAULA DOSSETT. I live in MONTGOMERY County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financial and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should be first completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that, while I did not personally verify the foregoing statements of fact, I have full faith and confidence in the legal and accounting professionals that did so, and based on their representations, I feel all foregoing statements are true and correct. Further, I certify that I am over twenty-one years of age, I am of sound mind, and I am in no way bared from making this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO
PETITIONERS' PETITION TO REOPEN

My name is Deborah Jordan. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Geri Page. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Pete Campbell. I live in Madison County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Wanda Johnson I live in Madison County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Audrey Whitesides I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26 2018.

It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Lauren Greer. I live in Madison County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Debra BRADLEY I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is W. Grant Thomas. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24, 2018.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

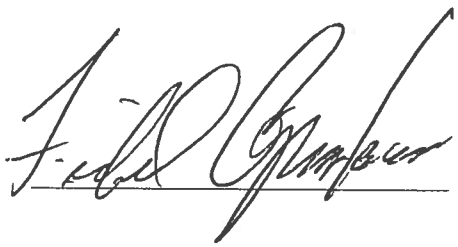
My name is Fidel Apodaca. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Gary D. Williams I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Paulette Harris I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

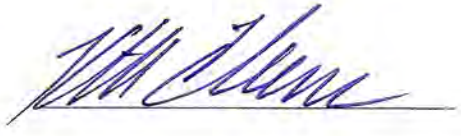
I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is ROXANA G. JOHNSON I live in HARRIS County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Nancy Tune. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy beca it won't release any data to back up these claims. Texas Central should be required to fully disclose information regarding the Project, given that it will negatively impact Texas communities and disr the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclos should be required, full discovery should be allowed, and the final Environmental Impact Statem should first be completed. The public must have adequate time to comment after all information disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Centra continuing efforts to hide information from the Texans whose lives and communities will be permanen affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that am qualified and authorized to file this statement.

-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is BEN BAKER. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Melba Davis. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Cynthia Simmons Gage. I live in Freestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Harold J. Lemmons. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Calvin Scarle. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Eliza A. Torres I live in Travis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Surface Transportation Board Statement

By completing and submitting the form below, The Beckham Group, the law firm selected by Texans Against High-Speed Rail to work on our behalf, will include your statement in the official comprehensive reply to the Surface Transportation Board regarding the petitions made by Texas Central Partners.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Roy L. Floed, Sr. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed,

and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

Please be sure to compete all form fields. The series of letters and numbers following the zip code box should be typed in the box next to the "submit" button. Be sure to click "submit" to ensure your statement will be included in the Texans Against HSR response to the Surface Transportation Board.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is James VanBeek. I live in Brazos County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Oscar Alonso. I live in Dallas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 21, 2018.

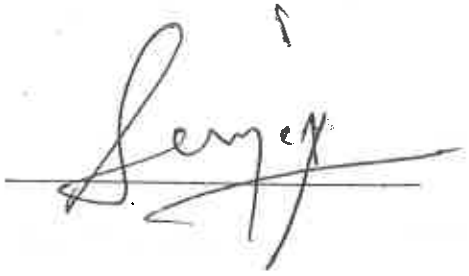
Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

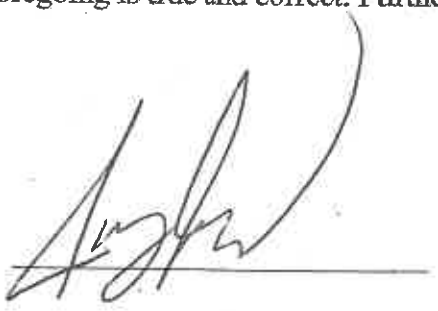
Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Amber Mitchell I live in Dallas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Jim Stowe. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Mrs John Posey I live in Freestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Christie Anz. I live in Freestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is T.S. Miles Kelly Jr. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is AnnaBeth Neasan I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Eugena P. Scott. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Nancy Mayhew. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 15, 2018.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Jim Candler. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Ann McDuffie I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Megan Greenwood. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Aubrey Sauer I live in Hardin County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

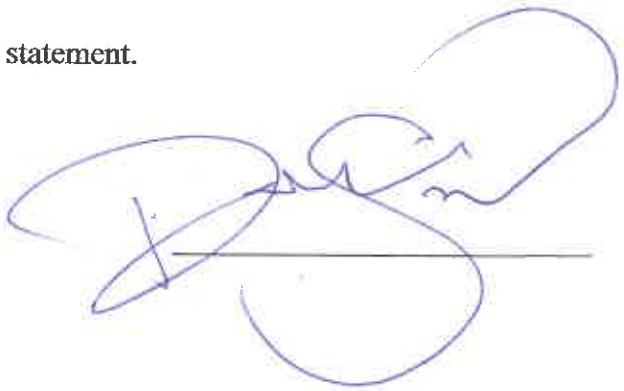
My name is Andrew Lozen. I live in Kaufman County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Victoria Nava. I live in Limestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 21, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Catherine Price. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Casey Cagnac. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

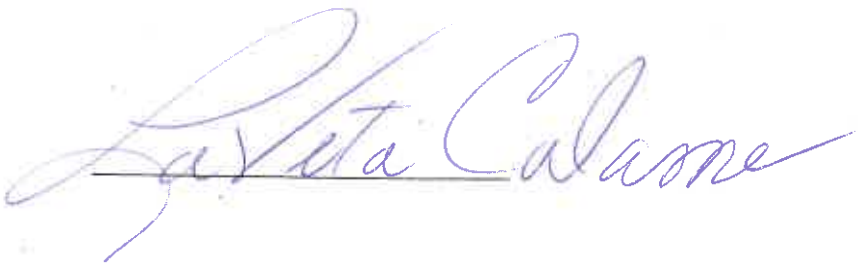
I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kayleen Nepier. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Michael Jarrett I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

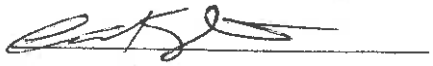
My name is Anthony Knight. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

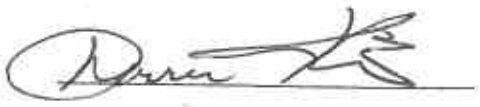
And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Moriah Wout. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Dennis Redden. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Sherae Phillips I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 19, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Wes Leake. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Latonia Lacy I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Pat Bruegger. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 15, 2018.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.
