If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 24,2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Peter Kypreos. I live in Galveston County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Brandy Graham. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Marietta Hinds. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Iris White. I live in Limestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25,2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Eleanor Reeves. I live in Texas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25,2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Marla Box. I live in Dimmit County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on 25 May 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Grady Griffeth. I live in Wise County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kirk Baxter. I live in Jim wells County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Robert Johnson. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Cody Harris. I live in Anderson County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Sharon Smith. I live in Montgomery County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Cheryl Collum. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Alyssa Jewell. I live in Navarro County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Sylvia Moss. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Carola Lowe. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Chris Castellani. I live in Texas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 27th, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 26, 2018.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 27, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kathy Miller. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Daniel Pierce. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 27,2018.

Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 27 2018.

SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Devon Tuggle. I live in Texas County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Carol Chapman. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 27, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28,2018.

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Mary Pittman. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is ANTHONY klonaris. I live in waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on may 28, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Kirk Bailey. I live in Bell County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Rodney Abshire. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Alfredo Magana. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Dennis Hogan. I live in Bowie County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Doris Grainger. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Melinda Nunez. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Donna Carlson. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 28, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Karen Robeson. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Dianne Epps. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Ron Marshall. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Lorrianne Trainello. I live in Freestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on MAY 29, 2018.

Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Daniel Brown. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29,2018.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Peggy Merritt. I live in Ellis County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 25, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is L M. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is bruce mcdonald. I live in TX County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29,2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Elsa Kern. I live in Hays County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Thomas Buhler. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29,2018.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Marie Hancock. I live in Leon County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

_____

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

_____

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Jake Marcisz. I live in Waller County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29,2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 29, 2018.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Joe Mitchell. I live in Grimes County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 20, 2018.

Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

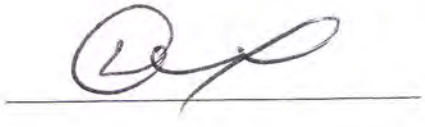
My name is Damian Ambroa I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is LIJI JOHN. I live in Fort Bend County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 20, 2018.

I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

My name is SCOTT WALLACE. I live in WALKER County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

BEFORE THE
SURFACE TRANSPORTATION BOARD

Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF TEXANS AGAINST HIGH SPEED RAIL'S REPLY TO PETITIONERS' PETITION TO REOPEN

My name is Charles Little. I live in Limestone County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.

Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Finance Docket No. 36025

TEXAS CENTRAL RAILROAD AND INFRASTRUCTURE, INC. &
TEXAS CENTRAL RAILROAD, LLC
-AUTHORITY TO CONSTRUCT AND OPERATE-
PASSENGER RAIL LINE BETWEEN DALLAS, TX AND HOUSTON, TX

VERIFIED STATEMENT IN SUPPORT OF **TEXANS AGAINST HIGH SPEED RAIL'S** REPLY TO PETITIONERS' PETITION TO REOPEN

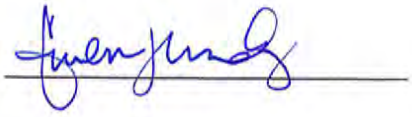
My name is Gwen Hernandez. I live in Harris County, Texas and will be affected by the 240-mile-long high-speed rail line (Project) proposed by Texas Central Railroad and Infrastructure, Inc. and Texas Central Railroad, LLC. (Texas Central). I am aware that Texas Central has filed a Petition to Reopen these proceedings in which it asks the Surface Transportation Board (Board) to take jurisdiction over the Project and to reconsider its Petition for Exemption filed in 2016.

I oppose Texas Central's Petition for Exemption. Texas Central continues to hide information about the Project from the public and I do not think the Board has sufficient information to make an informed decision at this time. I question how this Project can be built, considering how Texas Central's cost numbers keep changing. It first told the Board the Project would cost $10 billion to construct, but that number has already risen to $18 billion. And Texas Central has promised the Project will be privately funded, but Texas Central admitted under oath that it has secured less than 1% of the financing it needs for the Project. Also, Texas Central will not disclose its business plan or any financial information. Texas Central has also admitted that it will aggressively seek federal funds. Given what has happened in California with its Project, the Board must require that Texas Central release all of its financials and related information to ensure that Texas does not end up with a half-built train.



Texas Central has also increased its ridership projections from what it initially told the Board even though Texas Central refuses to release the "studies" that allegedly support these projections. I also

do not understand how Texas Central plans to generate billions of dollars for the Texas economy because it won't release any data to back up these claims. Texas Central should be required to fully disclose all information regarding the Project, given that it will negatively impact Texas communities and disrupt the peace and enjoyment of thousands of Texans' private property.

If the Board exempts Texas Central from filing a full application, the Board will be guilty of failing to protect the public interest. The Board must take a "hard look" at the Project. Full disclosure should be required, full discovery should be allowed, and the final Environmental Impact Statement should first be completed. The public must have adequate time to comment after all information is disclosed. Only then will the Board be in a position to make an informed decision. Texas Central has not been transparent at any point of this process, so in turn, I am relying on the Board to stop Texas Central's continuing efforts to hide information from the Texans whose lives and communities will be permanently affected by this Project.

I declare under penalty of perjury that the foregoing is true and correct. Further, I certify that I am qualified and authorized to file this statement.

Executed on May 23, 2018.
