Harriet Susman

Dear Mrs. Johnson-Ball

Because our members of Congress know the STB process favors the railroads, they have introduced legislation that will bring rail law into the 21st Century. HR 6707 - The Taking Responsible Action for Community Safety Act - TRACS bill, would require that the STB consider the impact of a transaction on the surrounding communities. It gives you the ability to not approve a transaction that would harm the health, safety, and ~~bring~~ economic harm to the communities. Please help us pass this bill.
