Message:

The EJ&E line running through the region would see a 3 fold increase in the number of trains per day and an increase in train length from 2,590 ft to 6,321 ft. We dont need that The result would be cars backed up for ever waiting on the trains to pass, increase emmissions and add public safety hazards. It would also hinder the expansion of the South Shore Line and would hinder the expansion of Gary/Chicago International Airport. None of this is any good for Northwest Indiana. Thank you for your time.
