Message:

It is hard to imagine the frustration and real chaos that will ensue in this area, affecting traffic for miles and miles surrounding the Barrington communities, should this acquisition somehow find approval from your Board. Making train traffic which, let's face it, is more often than not carrying hazardous waste or materials for disposal, an easier, faster trip for those conveying it is a laughable proposition. The right choice, the one on the side of residents, seems obvious. I hope it is obvious to you board members, too.
