I am all in favor of the CN purchase of the EJE railway! There is no better way to ship our nation's product than by rail. We need to get more trucks off our highways. You can't beat the railroad when it comes to transportation of freight and passengers. If we are worried about global warming, saving precious fuel and resources and reducing pollution and protecting the environment, then the answer is the railroad. Being stopped at a grade crossing for a few minutes while 10,000 tons of freight goes by is no problem. Most of these towns built around the railroads and have congested themselves to the max. They have created their own problems. God bless CN -
