

4-22-16

Dear Dave & Transpo. Board,

I am writing to ask you to please not build the Great Lakes Basin RR through our community. I know that you may not care about the people that live in these communities..but I do. I am terrified of loud noises, and this will disrupt our whole quiet way of life forever. I am scared that you will do this regardless of what the people want, because it has to do with profits/business. But, I am begging you not to do this, PLEASE! We love where we live, quiet and serene. If you lived here, you would want the same. Please do not do this. We are a family of 7. I speak for all of us!

Please find another way..through more urban areas that already have lots of noise!

Sincerely,

A handwritten signature in cursive script, appearing to read 'Gina Miller'.
