Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

I am very ^{concerned} about the emergency vehicles getting through the crossings. Our area will be pressed to get across the railline crossings for emergencies. Precious minutes will be lost and some lives will be sacrificed for trains coming through at various times. There are going to be traumatic deaths due to minutes lost.

Also school bus times will have to be run with train schedules. The traffic congestion has been an issue, now trains will add to this.

I also will live in fear of train derailments and accidents. Spilled chemicals, car accidents and more pedestrian accidents.
