630-293-7416. And I live in the Maple Hill Association and uh my property backs up to the railroad, uh the proposed rail that's going to be sold to the Canadian Rail and um I already hear trains and the vibration from, I feel the vibration from trains at times, uh currently and in the future if this uh if the train is sold to CN um I'm sure I'll hear and feel the impact of the new train um much more, up to 45 times more trains a day and that would significantly impact uh where I live and also I'm sure the value of my property since people are not going to want to purchase a property so close to um uh a train line that has many trains going by a day. I just bought this property May 1st, um assuming that, you know, the train situation would stay the same and now it's possibly going to be changing. So, I'm totally against the purchase of this um railroad by CN and also the fact that I live so close to the tracks and the possibility of the new train having hazardous materials on it, is um really going to impact not only me, but my neighbors and um, I just feel that it's, it's just totally inappropriate for them to purchase this uh train, this train. Um, so those are my comments, um if you have any further, if you have any questions or you need to get a hold of me, please contact me at 630-293-7416. Thank you
