Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

Safety... Safety... Safety is a very important concern to all of us. By increasing the number of trains that run through our town would be ~~majorly devastating to our~~ comprising the safety of our children & everyone who lives in ~~our~~ our town! These tracks dissect our "Downtown"

in 3 major intersections - adding more
trains would create Absolute Gridlock —
~~not to mention safety issues~~

We are also very concerned about the environmental impact this would have on our community + the Chicago area.

As human beings we need to respect each other's habitats + make sure they are environmentally safe. Profit should never outweigh the quality of life of individuals. Life is too short to ~~make~~ compromise our well being + environmentally safe neighborhoods. — No more Trade!
