() NEW COMMENTS WERE RECEIVED

The Office of Environmental Analysis (OEA) served an Environmental Assessment (EA) for this proceeding on April 11, 2014 for public review and comment. In the EA, OEA recommended one environmental condition and concluded that the proposed action would not significantly impact the quality of the human environment.

Conclusions

The EA comment period has ended and no environmental comments have been received. Accordingly, OEA recommends that the following condition previously recommended in the EA should be imposed upon any decision granting abandonment authority:

- 1. Norfolk Southern Railway Company (NSR) shall retain its interest in and take no steps to alter the historic integrity of all historic properties including sites, buildings, structures, and objects within the project right-of-way (the Area of Potential Effect) that are eligible for listing or listed in the National Register of Historic Places until the Section 106 process of the National Historic Preservation Act, 16 U.S.C. § 470f, has been completed. NSR shall report back to the Office of Environmental Analysis (OEA) regarding any consultations with the Virginia Department of Historic Resources (State Historic Preservation Officer or SHPO) and the public. NSR may not file its consummation notice or initiate any salvage activities related to abandonment (including removal of tracks and ties) until the Section 106 process has been completed and the Board has removed this condition.**

If the above condition is imposed, OEA believes that the proposed action will not significantly affect the quality of the human environment.
