

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

I am very worried about the safety issues and the CN's terrible safety record that it currently has. The 20+ trains a day will cross over the street that our school buses travel over. That does not include the after school activities or sporting events. The welfare of our children is at stake.

The pollution and would be escalated and the traffic would be unbearable.

Our property values would be deflated and the businesses in town would be in jeopardy.
