E-Mail: _____

How will CN's proposed acquisition of the EJ&E impact you?

This rail line cuts through at least three major intersections as well as cuts the village right in half. The cities and villages along this line can not take the volume of international intermodal traffic that the CN is intending to burden it with. Due to the fact that most of the EJ&E is single track - 15 to 20 trains a day means there will be almost continuous rail traffic flow. I understand the economic benefits, however the EJ&E is just the wrong line for the expected use by the CN.
