Hi,

David Navecky has asked that I take over as the Surface Transportation Board's (STB) contact for the implementation phase of the Section 106 Programmatic Agreement (PA) for the Alaska Railroad Corporation's Northern Rail Extension Project (STB Docket No. 34658). This looks like an interesting project from many standpoints - certainly the archaeology.

By way of introduction, I have been working at the STB since 2003 as its historic preservation specialist. I am an archaeologist by training and worked for Hawaii Volcanoes National Park as its project archaeologist before coming to work for the government here on the Mainland (I was at FHWA before coming here).

As my first project task, below I have included Attachment B: Agency Consultation and Coordination Plan for your review and comment. As you know, this part is a requirement of the PA under Stipulation 1D. The document is attached in PDF and Word formats.

I look forward to working with you on this project. Please feel free to give me a call if you have any questions.

All the best,
 Cathy Glidden
