Transcript:

I'm very concerned about this Canadian National purchase of EJ&E railroad. The study gives absolutely no regard to what happens in three years to control the amount of trains going through. CN, Canadian National is already starting to use the EJ&E tracks now. There has been twenty minutes delay on Cuba Road and there's been a twenty minute delay for the METRA train going to Barrington because of freight train crossing. I think that there is no regard for the citizenship or anything in this and only it regard for the Canadian National. If somebody would please give me a call, I would appreciate it 847-540-6354. Thank you
