How will CN's proposed acquisition of the EJ&E impact you?

I frequently travel south ~~of~~ on Hwy 59 to get to the Barrington train station and the EJ&E tracks cross 59 south of Hwy 14 and north of Main St (Lake Cook).

In order to reduce pollution CN should demonstrate that it has software to minimize conflicts with ~~the many~~ ^{trains on} ~~intersecting~~ lines intersecting with EJ+J (I assume CN will have to stop for all passenger trains).

When CN trains do stop, they should stop at a point which does not block major streets (such as Hwy 14 and 59 in Barrington).
