Re: STB Docket No. FD 36496

Dear Counsel:

Our review of the documents that you produced in response to Amtrak's discovery request indicates that you did not provide some of the data in a usable format. Specifically, you produced several RTC input/output files without any information identifying which particular model or "case" they are associated with. The following is a non-exhaustive list of such files we have identified thus far in your production:

CSX_AmtrakGC_0006786 to CSX_AmtrakGC_0006816;
CSX_AmtrakGC_0006829 to CSX_AmtrakGC_0006865;
CSX_AmtrakGC_0006872 to CSX_AmtrakGC_0006903;
CSX_AmtrakGC_0006920 to CSX_AmtrakGC_0006924;
CSX_AmtrakGC_0006937 to CSX_AmtrakGC_0006949;
CSX_AmtrakGC_0006957 to CSX_AmtrakGC_0006989

These files are not contained in families and no file path or other descriptive information was provided that could explain which input/output files should be grouped together to create a unique RTC case. It would be helpful if you could provide additional information about these files that would allow the data to be analyzed and used, including identifying which files comprise which case. In addition, with respect to CSX_AmtrakGC_0028947 dated October 17, 2016, we are requesting the family of model files that produced that output.
