Re STB Finance
Docket No 35087

Dear Madam,

The proposed 400% increase in train traffic by the sale of ETE to C.N. would be unbearably noisy & hazardous!

No doubt they would want to start sending those trains before the under/over passes are phased in. Freight trains take forever to pass! Why would we want to cut our village in two?

Furthermore, when the underpasses are built we are likely to have flooding after heavy rain.

I say NO even if C.N. pays 100% for the over/under passes; the thought of their sending Chinese goods from a Canadian port to Memphis via our village is deplorable.

Yours sincerely

Sheila Ozcan
