

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date:

9/11/08

I have just one question. If CNR wanted to lay tracks where the tracks are today that they want to purchase, would they be allowed to do so? If your answer is NO, how can you then allow them to run all of their trains thru all of these towns now. The ripe effect of this purchase is devastating. Please take a closer look at the harm that this will do to so many.
