Dear Mr. Navecky

Our family, and many of our Kankakee County neighbors are opposed to this GLB Railroad! According to the provided map route from LaPorte, IN to Milton, WI, the RR will cross the Kankakee State Park within a mile of a nesting Bald Eagle family!! We believe the noise from 110 possible daily freight trains would drive away most of our wild animals, not to mention the environmental impact of the interrupted waterway. We would be happy to provide Bald Eagle and State Park pictures, if this will help.

This route will also disrupt the daily schooling of our Pre-school through 1st grade students in the Herscher Unit 2 School District! The RR would come within a half mile of our newly updated Bonfield Grade School. The vibration and noise will be far too much! The vibration to the newly installed pipeline just to the north of the State Park will create a GRAVE danger to these students!!

Thank you for your consideration in BLOCKING this proposed project.

Terry and Mike Shafiabady
