708-339-0556. I just wanted to say I'd like to voice our opinion is it would be really great not to have so many trains come through our village. We have over 20 trains all day long, if we can reduce that to 4 or so, that would be wonderful. If you can record that properly, I would really, really appreciate that. Less trains and more access to our highways, it would be great. If that means allowing the trains changes to take over that would be good. To revert, to send those trains around our village, that would be fine. Again, this is in South Holland, IL, we have a lot of trains all day long and if we can reduce that, it would be wonderful. Thank you very much, I appreciate it. Good bye.
