Transcript:

I want to make a comment objecting to the CNN acquiring the EJ&E Railroad and my objection is this, as a member, being a trustee with the West Chicago Fire Protection District and I am a resident of the City of West Chicago, I want to object to the fact that our fire department is having much, much response, less, less of a response time. I mean in other words, we do not have time to get to the people if there are more railroad trains coming to our city. We have already a very, very, very serious response time, which the response time is too long, at this time we're trying to correct that problem and with the UP and the Canadian National then being it will add to this problem that we're having to getting to the residents for help with the ambulances. I really strongly object to any more railroad traffic in this, and besides that it will increase the fact that our town has a junction in this town crossing North STAR with EJ&E and east-west to the Union Pacific, it at least doubles or more the time you must wait for a train to get through there. So it increases everything as far as time hurting the people from getting help with the ambulance, hurting the people from getting where they're going, hurting the schools because the children could be late, and it increases all the possibilities of more accidents. This is my statement <Repeated name and address> 630-231-6391. Thank you for hearing my protest.
