Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8-27-08

1. Safety is my number one concern. I am deeply concerned for our children's safety. The route through Barrington offers many possibilities for accidents affecting these children due to walkers / bikers over these tracks.

I feel the delays to medical personnel, police & firemen causes enormous risk to our well being living in this community.

Absolutely no argument can be made financially or otherwise that would outweigh the reduced response time to deal with emergencies.

2. Environmentally I have great concern regarding what & how products will be transported. Haz Mat material spills has caused injury & even death in other communities that have the type of freight trains proposed to move through Barrington.

3. Lower values to our hard earned standard of living causes me great concern. The noise alone would cause me to fight against this. There is no question this will lower the standard of living and quality of life. I personally along with my wife have worked so hard to attain. I am strongly opposed to the proposed CN acquisition period.
