Message:

I'm writing to voice my concern over the possible sale of the EJ&E railroad tracks to CN. I strongly oppose this sale as it will greatly impact transportation in New Lenox. We already have backups in traffic due to commuter and freight trains. With so many grade crossings in the community, there are times when traffic is backed up for blocks just for a commuter train. If CN purchases the tracks, I understand that there will be a tremendous increase in the number and length of freight trains passing through the community. With an area that's already overloaded with traffic woes due to the increase in population, we do not need the added stress of roads being blocked by more freight traffic.
