

SERVICE DATE – MARCH 18, 2020

SURFACE TRANSPORTATION BOARD

DECISION

Docket No. EP 290 (Sub-No. 5)

(2020-2)

QUARTERLY RAIL COST ADJUSTMENT FACTOR

Digest:¹ The rail cost adjustment factor (RCAF) is an index formulated to represent changes in railroad costs incurred by the nation's largest railroads over a specified period of time. The Surface Transportation Board (Board) is required by law to publish the RCAF on at least a quarterly basis. Each quarter, the Association of American Railroads computes three types of RCAF figures and submits those figures to the Board for approval. The Board has reviewed the submission and adopts the RCAF figures for the second quarter of 2020.

Decided: March 17, 2020

In Railroad Cost Recovery Procedures, 1 I.C.C.2d 207 (1984), the Interstate Commerce Commission (ICC) outlined the procedures for calculating the all-inclusive index of railroad input prices and the method for computing the rail cost adjustment factor (RCAF). Under the procedures, the Association of American Railroads (AAR) is required to calculate the index on a quarterly basis and submit it to the agency on the fifth day of the last month of each calendar quarter. In Railroad Cost Recovery Procedures—Productivity Adjustment, 5 I.C.C.2d 434 (1989), aff'd sub nom. Edison Electric Institute v. ICC, 969 F.2d 1221 (D.C. Cir. 1992), the ICC adopted procedures that require the adjustment of the quarterly index for a measure of productivity.

The provisions of 49 U.S.C. § 10708 direct the Surface Transportation Board (Board) to continue to publish both an unadjusted RCAF and a productivity-adjusted RCAF. In Productivity Adjustment—Implementation, 1 S.T.B. 739 (1996), the Board decided to publish a second productivity-adjusted RCAF called the RCAF-5. Consequently, three indices are now filed with the Board: the RCAF (Unadjusted); the RCAF (Adjusted); and the RCAF-5. The RCAF (Unadjusted) is an index reflecting cost changes experienced by the railroad industry, without reference to changes in rail productivity. The RCAF (Adjusted) is an index that reflects national average productivity changes as originally developed and applied by the ICC, the calculation of which is currently based on a five-year moving average. The RCAF-5 is an index

¹ The digest constitutes no part of the decision of the Board but has been prepared for the convenience of the reader. It may not be cited to or relied upon as precedent. See Policy Statement on Plain Language Digests in Decisions, EP 696 (STB served Sept. 2, 2010).

that also reflects national average productivity changes; however, those productivity changes are calculated as if a five-year moving average had been applied consistently from the productivity adjustment's inception in 1989.

The index of railroad input prices, RCAF (Unadjusted), RCAF (Adjusted), and RCAF-5 for the second quarter of 2020 are shown in Table A of the Appendix to this decision. Table B shows the fourth quarter 2019 index and the RCAF calculated on both an actual and a forecasted basis. The difference between the actual calculation and the forecasted calculation is the forecast error adjustment.

AAR's calculations have been examined by the Board's Office of Economics, and the Board finds that AAR has complied with agency procedures. The Board finds that the second quarter 2020 RCAF (Unadjusted) is 1.051, an increase of 0.8% from the first quarter 2020 RCAF (Unadjusted) of 1.043. The RCAF (Adjusted) is calculated, in part, using the RCAF (Unadjusted) and a five-year moving geometric average of productivity change for U.S. Class I railroads from 2014-2018, which is 1.010 (1.0% per year). The second quarter 2020 RCAF (Adjusted) is 0.442, an increase of 0.5% from the first quarter 2020 RCAF (Adjusted) of 0.440.²

In accordance with Productivity Adjustment—Implementation, 1 S.T.B. at 748-49, the RCAF-5 for this quarter will use a productivity trend for the years 2013-2017, which is 1.005 (0.5% per year). The RCAF-5 for the second quarter of 2020 is 0.417, an increase of 0.7% from the first quarter 2020 RCAF-5 of 0.414.³

This action is categorically excluded from environmental review under 49 C.F.R. § 1105.6(c).

Authority: 49 U.S.C. § 10708.

It is ordered:

1. The Board finds that the second quarter 2020 RCAF (Unadjusted) is 1.051, RCAF (Adjusted) is 0.442, and RCAF-5 is 0.417.

2. Notice of this decision will be published in the Federal Register.

² The second quarter 2020 RCAF Adjusted (0.442) is calculated by dividing the second quarter 2020 RCAF Unadjusted (1.051) by the second quarter productivity adjustment factor (PAF) of 2.3764. The second quarter 2020 PAF is calculated by multiplying the first quarter 2020 productivity adjustment of 2.3705 by the fourth root (1.0025) of the 2014-2018 annual average productivity growth rate of 1.0%.

³ The second quarter 2020 RCAF-5 (0.417) is calculated by dividing the second quarter 2020 RCAF Unadjusted (1.051) by the second quarter productivity adjustment factor-5 (PAF-5) of 2.5220. The second quarter 2020 PAF-5 is calculated by multiplying the first quarter 2020 PAF-5 of 2.5190 by the fourth root (1.0012) of the 2013-2017 annual average productivity growth rate of 0.5%.

3. The effective date of this decision is April 1, 2020.

By the Board, Board Members Begeman, Fuchs, and Oberman.

APPENDIX**TABLE A**

EP 290 (Sub-No. 5) (2020-2)
All Inclusive Index of Railroad Input Costs
 (Endnotes Following Table B)

LINE NO.	INDEX COMPONENT	2018 WEIGHTS	FIRST QUARTER 2020 FORECAST	SECOND QUARTER 2020 FORECAST
1	LABOR	33.0%	443.7	441.9
2	FUEL	15.9%	250.2	231.2
3	MATERIALS AND SUPPLIES	5.1%	267.0	266.7
4	EQUIPMENT RENTS	5.3%	240.1	239.4
5	DEPRECIATION	15.0%	225.3	225.8
6	INTEREST	2.1%	57.2	57.2
7	OTHER ITEMS ¹	23.6%	229.9	235.5
8	WEIGHTED AVERAGE	100.0%	301.8	299.5
9	LINKED INDEX ²		281.7	279.6
10	PRELIMINARY RAIL COST ADJUSTMENT FACTOR ³		106.5	105.7
11	FORECAST ERROR ADJUSTMENT ⁴		-0.022	-0.006
12	RCAF (UNADJUSTED) (LINE 10 + LINE 11)		1.043	1.051
13	RCAF (ADJUSTED)		0.440	0.442
14	RCAF-5		0.414	0.417

TABLE B

EP 290 (Sub-No. 5) (2020-2)
Comparison of Fourth Quarter 2019 Index
Calculated on Both a Forecasted and an Actual Basis

LINE NO.	INDEX COMPONENT	2018 WEIGHTS	FOURTH QUARTER 2019 FORECAST	FOURTH QUARTER 2019 ACTUAL
1	LABOR	33.0%	443.8	443.8
2	FUEL	15.9%	249.9	248.5
3	MATERIALS AND SUPPLIES	5.1%	322.9	322.9
4	EQUIPMENT RENTS	5.3%	240.7	241.5
5	DEPRECIATION	15.0%	225.1	225.6
6	INTEREST	2.1%	57.2	57.2
7	OTHER ITEMS	23.6%	231.7	231.2
8	WEIGHTED AVERAGE	100.0%	305.1	304.8
9	LINKED INDEX		284.8	283.4
10	RAIL COST ADJUSTMENT FACTOR		107.7	107.1

Endnotes:

¹ “Other Items” is a combination of Purchased Services, Casualties and Insurance, General and Administrative, Other Taxes, Loss and Damage, and Special Charges, price changes for all of which are measured by the Producer Price Index for Industrial Commodities Less Fuel and Related Products and Power.

² Linking is necessitated by a change to the 2018 weights beginning in the fourth quarter of 2019. The following formula was used for the current quarter’s index:

$$\frac{\text{2nd Qr. 2020 Index}}{\frac{\text{(2018 Weights)}}{\text{1st Qr. 2020 Index}} \text{ (2018 Weights)}} \times \text{1st Quarter Linked Index (1980 = 100 Linked)} = \text{Equals Linked Index (Current Quarter)}$$

Or

$$\frac{299.5}{301.8} \times 281.7 = 279.6$$

³ The first quarter 2018 RCAF was re-based using the October 1, 2017 level of 264.5 in accordance with the requirements of the Staggers Rail Act of 1980 (10/1/2017 = 100).

⁴ The second quarter 2020 forecast error adjustment was calculated as follows: (a) fourth quarter 2019 RCAF using forecasted data equals 107.7; (b) fourth quarter 2019 RCAF using actual data equals 107.1; and (c) the difference equals the forecast error (b-a) of -0.6. Because the actual fourth quarter value is less than the forecast value, the difference is subtracted from the Preliminary RCAF.
