

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/29/08

I am a recent arrival to Barrington. My family moved here a year ago. I soon learned that avoiding the congestion caused by existing car and rail traffic in downtown Barrington was vital to getting to shopping, services and schools. The 5 fold increase in rail caused congestion will render the downtown impassable and impassable. I do not believe that allowing this situation is consistent with a livable, functioning town.
