**CANADIAN PACIFIC RAILWAY LIMITED, ET AL. – CONTROL – KANSAS CITY SOUTHERN, ET AL.
(GENERAL OVERSIGHT)****CPKC's JULY 2, 2025 UPDATE TO SERVICE ACTION PLAN**

Canadian Pacific Kansas City Limited ("CPKC"), on behalf of its U.S. rail carrier subsidiaries,¹ is providing this update to the "Service Action Plan" reported herein on June 20 (CPKC-34). Figures 1 and 2 below provide more recent data regarding CPKC's First-Mile Last-Mile (Industry Spot and Pull) ("FMLM") and manifest on-time ("Manifest OTP") performance through the week ending June 27.

As shown in Figure 1, FMLM performance has improved in the past week, from a CPKC-wide average of 85.3% for the week ending June 20 to an average of 90.7% for the week ending June 27. CPKC's four-week rolling average FMLM performance of 81.3% is materially above the service action plan trigger associated with this metric (*i.e.*, 76.0%). As before, Figure 1 depicts four-week rolling average performance with the dashed red line, with weekly performance levels shown in solid red.

¹ CPKC's U.S. rail carrier subsidiaries include Soo Line Railroad Company; Central Maine & Quebec Railway US Inc.; Dakota, Minnesota & Eastern Railroad Corporation; Delaware & Hudson Railway Company, Inc. (collectively "CP" or "CP/Soo"); The Kansas City Southern Railway Company, Gateway Eastern Railway Company, and The Texas Mexican Railway Company (collectively, "KCS").

FIGURE 1

As shown in Figure 2 below, the increase in CPKC’s average FMLM performance level shown in Figure 1 reflects continuing week-over-week improvements in performance levels on the legacy-KCS network. The orange dashed line shows FMLM performance in the CPKC operating divisions that span legacy-KCS territory (Midwest, Shreveport, Southeast, and Southwest) as steadily improving and approaching that for the CPKC network overall.

FIGURE 2

As shown in Figure 3 below, CPKC's Manifest OTP performance has improved somewhat in the most recent week, with performance at 57.5% for the week ending June 27. The four-week average fell slightly week-over-week as a result of the decline in performance in early June.

FIGURE 3

CPKC is continuing to devote the resources and attention necessary to return service levels to the normal range expeditiously. Among CPKC’s key areas of focus for the upcoming week are the following, all against the backdrop of ongoing attention to restoring effective operations across the legacy-KCS network:

Operations:

- CPKC’s Operating leaders will continue to maintain an in-person, boots-on-the-ground presence at the key legacy-KCS yards in Beaumont, Port Arthur, Shreveport, and Jackson to support continued “catchup” needed to bring network fluidity back to normal levels;

- CPKC Operations will continue to validate and align the mapping of local service plans and customers for each terminal to support efficient service plan execution using post-Day N IT systems;
- CPKC Operations will continue to manage active cars online, reduce dwell, and deliver local service; and
- CPKC Operations will identify and implement sustainable process improvements designed to support operations that are well informed by valid data, support disciplined and predictable operations, and more effectively meet customer service expectations.

Information Technology:

- CPKC's IT personnel (along with counterparts from shipment management and customer service) will maintain their in-person presence at locations across the legacy-KCS network to support operating personnel and customers with their deployment of post-Day N IT systems, with a continued focus on the Southeast Division (areas east and southeast of Shreveport);
- CPKC IT will support Operations' focus on improved car inventories through the implementation of new internal location reporting and data validation; and
- CPKC IT will review and implement systems enhancements as necessary to improve CPKC's internal operational processes and address customer needs with respect to waybilling, car ordering, and car tracking.

Customer Communications:

- CPKC will issue customer bulletins more frequently to address the status of CPKC’s service recovery efforts and “what to expect” from those efforts in the near term;
- CPKC will continue to reach out to customers of all sizes, shipping all types of commodities, and located in all parts of the legacy-KCS network to solicit feedback on the issues they are facing with an eye to identifying areas warranting attention and tailoring solutions to customer needs; and
- CPKC will continue working collaboratively with customers to find sustainable and workable solutions for IT and process-related issues that cause recurring challenges for customers.

CPKC continues to project that it will achieve a return of service performance to the normal range for the vast majority of customers by the second half of July. CPKC will provide its next weekly update on Wednesday, July 9.

Respectfully submitted,
